OC-228 Granite Isl update by Andy VK5MAV

I am completely disappointed with the position of the Department of Nature for South Australia, which controls access to the islands. I have only one last option – very easy, time and conditions are limited, there will be no night activity since.

I plan to make a test visit to Granite Island on July 12, starting from about 1 to 6 am GMT. QRV on 20/15 m, CW. 100W, GP, battery. The propagation forecast shows slightly better conditions at 1-3 am – SP to EU, and 3-6 hours SP to NA.

Access to the island is allowed only in the absence of strong winds that day, only in daylight (from about 9:00 UTC 11/07 to 7:00 UTC 12/07). I can't work all daylight, sorry. Access to the island is via a long wooden bridge by tram or 3 km on foot, and several kilometers around the island. Everything should be brought by hand and returned after I plan to use a garden trolley (like Craig VK5CE).

Approaching #13 Most Wanted DXCC

It's been a few years since any mention of an Aves Island DXpedition(YV0). Indeed, we have no information on any long-term future plans to activate this rare DXCC entity; in this crazy world we live in nowadays it's probably unlikely anyway.

Still, this didn't stop us at DX-World HQ wondering if in fact the remote islet was again growing out of the sea. DXers may recall that 90% of Aves Island was washed away in 2007 after **Hurricane Dean struck**.

A quick check of Club Log shows Aves is at **#13 most wanted** and while none of this post is about any Aves Island Dxpediton, we still think the video is worth watching during this quiet DXing period.
