DX World Quiz #10

Another week has passed. Therefore, another DX-World Quiz is ready. Good Luck or Bad Luck?!

<https://www.dx-world.net/dx-world-quiz-10/>

JX0X Jan Mayen –cancelled

It is with a heavy heart that we for various reasons hereby cancel the JX0X Dyped. While we worked hard for 18 months to secure the entry permit, the permit to stay onshore, the fundraising and the logistics – we have come to the conclusion that there are too many uncertainties involved in this project. There is not a single reason that we cancel but rather several reasons right up to today that altogether makes this a difficult project to complete. We would like to thank everybody who donated upfront to the JX0X DXpedition, and who believed in our team and our project. You all made a contribution to have the opportunity to work us guys next year, and you all made a difference no matter what you donated. It is people like you who donated upfront that makes DXing happen. Without upfront donations we will see less tent and generator DXpeditions to expensive places. We will start refunding 100% all paypal donations, and you should see your support returned soon.

OC-298 Tatakoto Atoll -update

I was very stressed when I arrived here this morning, despite being able to sleep in the plane for 4 hours. My host here in Papeete, an incredible guy I would recommend anyone who needs accommodation in Papeete, told me right away: you have to relax now, decompress, it's French Polynesia, things work differently here!

I will be early for my flight to Tatakoto tomorrow morning. I have a lot of luggage, and I'm not worried a bit about paying for it, but I'm a little concerned as to whether they will allow me to take everything with me. I know from past experience that this is not always possible. Flights to this atoll are so rare, that they may order some things to be flown in, so... who knows if there is sufficient space on the plane.

A60EMM Emirates Mars Mission

The United Arab Emirates has officially entered the global space exploration race. This came after His Highness Sheikh Khalifa bin Zayed al Nahyan, President of the UAE, issued a decree to establish the UAE Space Agency, and began working on sending the first Arab and Islamic probe to Mars, a project named "Hope Probe". This makes the UAE one of only nine countries working to explore Mars.

The probe will start its journey in 2020, and is scheduled to arrive to Mars by 2021, in celebration of the 50th anniversary of the union of the UAE. The planning, management and implementation of the probe project are implemented by an Emirati team, whose members depend on their skills and diligence to acquire all space exploration-related knowledge and applying it. The program is fully funded and supervised by the UAE Space Agency, while the probe is being developed by the Mohammed bin Rashid Space Centre (MBRSC), in collaboration with international partners.
