### **3D2AG/P Rotuma -update by Antoine (January 11)**

The boat is still on schedule arriving on the 15th January. Station dismantling is in progress, with the 6m yagi already packed and the Spiderbeam due to be taken down later this morning. As expected, last night was the first really good short-path opening into Europe on 20m, and if it happens again tonight it will have to be done on the inverted-V antenna facing the beach on a high coconut tree. The 160m conditions were poor again this morning, with just one EU station worked, but last night many JAs came in. North America is still very elusive on 160m from here; the inverted-L will be taken down on the 13th Jan and all operations cease by 0000 UTC on the 14th to pack the equipment. Several thousand QSOs were made so far and the logs (both CW and FT8) will be uploaded to Club Log after my return to Fiji. Sometimes stations might not have received their final RR73 on FT8, but nevertheless if reports were exchanged correctly they will be in the log. Fuel is running low, but should last over the remaining days; my health is slowly recovering despite the extreme heat. VY 73s and see you on the bands, Antoine 3D2AG
