## **News**

### **3D2RRR Rotuma –update by the team May 31**

We are planning to work FT4 normal all bands during the coming 2 days. Very strong winds make it difficult to keep the vertical antennas in place, but we are fighting!

### **R150WS Rykacheva Isl AS-104**

A video has now been produced showing the expedition journeying through the Arctic. Although in Russian language, it's still worth a watch. UA9KDF is also now also sending out QSL cards.

### **News update by Tom KH0/KC0W**

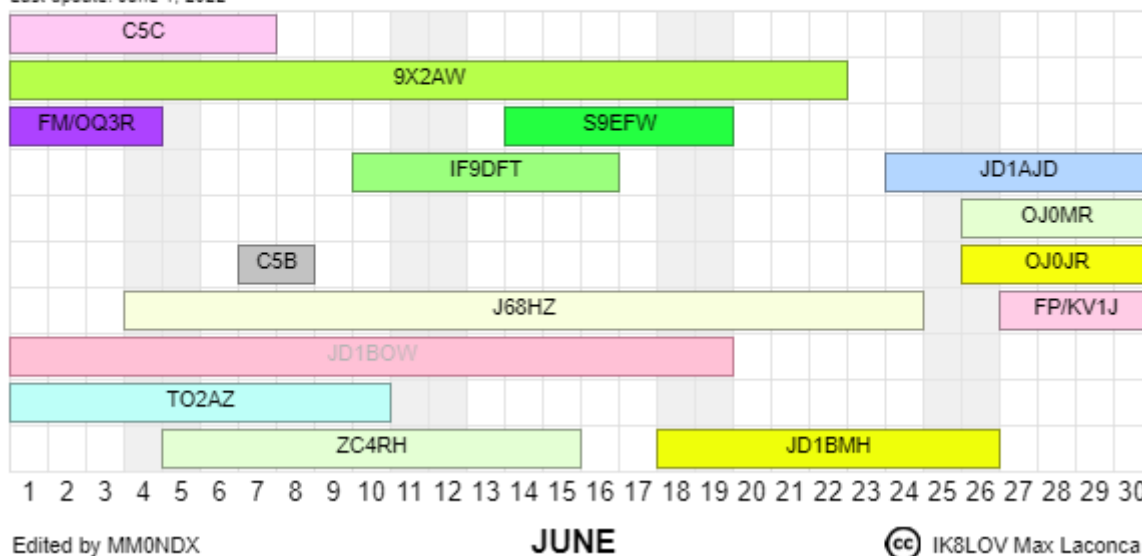

After 60,000+ CW, SSB and FT8 QSOs from my house as KH0/KC0W & KH0W I decided to go QRT on January 1st, 2022. I needed a new challenge so I decided to construct the KH0W/m station and operate CW only. As a ham radio purist it's absolutely imperative that all QSOs take place when the car is actually in motion & NOT sitting stationary. There are numerous large grassy areas on Saipan where I can drive in large circles while contesting/DXing from the mobile. I use a small laptop strapped to the center of my steering wheel which runs N1MM to send CW and log contacts. The telescoping antenna is a full 1/4 wave on 20 meters as well as 17, 15, 12, 10 & 6 meters. Yes, I'm aware a mag-mount is not optimal & I hope to upgrade the setup in the mobile near future with the purchase of new car and not the little jellybean I now drive.
