News

3B7M St Brandon –update February 22

Team on their way. Expect first signals in a day or two.

FT8WW Crozet Island –update February 22

Today, FT8WW was active on 10m SSB. This was Thierry's first foray using voice (other than QO-100) from Crozet. Signals generally not too strong, but certainly a new one / new mode for the many he worked.

Bouvet Island and ham radio by Bruno F5JYD

An interesting 35-page document compiled by Bruno F5JYD covering Bouvet and ham radio. For example, did you know the very first ever QSO with Bouvet took place in July 1951 with a station in Scotland ! https://www.cjoint.com/doc/23_02/MBtfor61JY6_Bouvet-F.pdf

VK9WX Willis Island –update

Last few days, VK9WX has been spotted and worked on FT8. This is the real VK9WX. Sands tells us he recently managed to put a cable together for FT8 using an old usb headset and a cable from PS2 type computer mouse.

CY0S Sable Island –update

The CY0S DXpedition team is very pleased to announce that John W2GD has joined our on-island team. John is our second team member that is in the Contest Hall of Fame. John brings a wealth of contest and DXpedition experience to the team. Final preparations continue at a quickening pace as it is just three weeks before team members begin their journey to Halifax, Nova Scotia. The team reports it has now reached 85% of its financial goal. It's not too late to support the CY0S DXpedition. Any support will be greatly appreciated and can be made through our website at: cy0s.com. Lou N2TU has the CY0S DXpedition Facebook page up and running.

DX0NE Spratly Island –update

Team leader, Gil 4F2KWT, informs that he has renewed the DX0NE license and is in talks with a possible transportation provider. Gil says this is better than the one last year as there will be a higher weight cap (amp maybe).

3Y0J by WDCOV

DXpeditions to remote frozen islands like Bouvet 3Y0J are extremely dangerous. Bouvet happens to be the most remote island on the planet. More people have flown to outer space than set foot on Bouvet.

On January 31, 2023 myself and three others landed on the island.

403A DXpedition Logistic Service

Exciting news!

Are you going on a serious DXpedition?

Are you part of a multinational team?

Will you be activating a most wanted or rare DXCC entity?

Will you be QRV from an interesting location?

Do you require DXpedition equipment support?

403A DXpedition Logistic Service

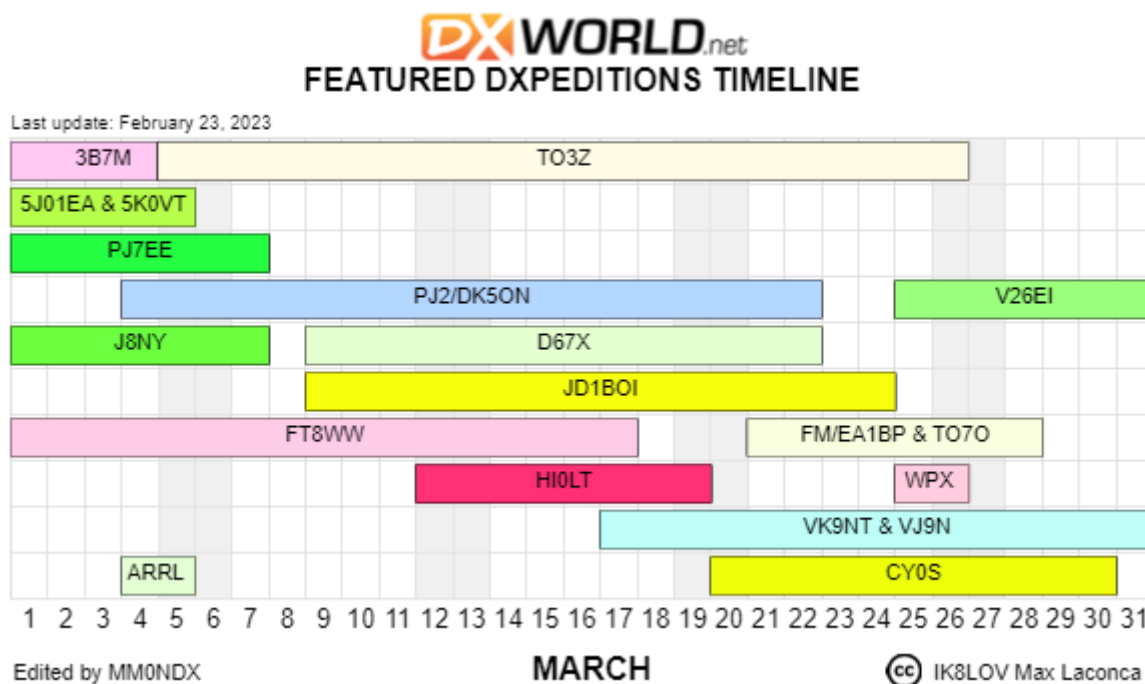

In a brand new partnership, two world renown amateur radio equipment manufacturers and providers – [403A](#) and [WiMo](#) – have joined forces to provide help and support to future DXpeditions through logistics, equipment, and service catered for individuals or groups who require such assistance.

KH7Z/MM Gridding across the Pacific

The Magnet, owned by George Wallner, AA7JV, and with Michael Snow, KN4EEI, on board is heading on a two year journey across the Pacific. Stops and callsigns will be announced shortly before arrival to prevent fake interlopers.

In an NCDXF sponsored pioneering experiment a remotely controlled 6 meter station will be operated along the way from hundreds of very rare grid squares. With the increased sunspot activity during the next two years, good conditions are expected on 6 meters, making these remote grid squares accessible to a large number of stations. We intend to test out the Starlink connections en route using the call **KH7Z/MM** in the afternoons when the vessel is in calm waters (rolling seas are not conducive to good satellite connectivity). Watch for spots on your local clusters.
